

(viii) Notifying the observer in a timely fashion of when all commercial fishing operations are to begin and end;

(ix) Not impairing or in any way interfering with the research or observations being carried out; and

(x) Complying with other guidelines or regulations that NMFS may develop to ensure the effective deployment and use of observers.

(5) Marine mammals incidentally killed during fishing operations and which are readily accessible to crew members, must be brought onboard the vessel as biological specimens and retained for the purposes of scientific research if feasible and requested by NMFS personnel, designated contractors, or the aboard observer. Marine mammals so collected and retained as biological specimens must, upon request by NMFS personnel, designated contractors, or the observer aboard, be retained in cold storage on board the vessel, if feasible, until removed at the request of NMFS personnel, designated contractors, or the observer aboard, retrieved by authorized personnel of NMFS, or released by the observer for return to the ocean. Such biological specimens may be transported on board the vessel during the fishing trip and back to port under this authorization.

(6) Any marine mammal incidentally taken may be retained only if authorized by NMFS personnel, designated contractors or an official observer aboard, or by a scientific research permit that is in the possession of the operator.

(d) *Observer requirements for Category III fisheries.* (1) The Assistant Administrator may place observers on Category III vessels if the Assistant Administrator:

(i) Believes that the incidental mortality and serious injury of marine mammals from such fishery may be contributing to the immediate and significant adverse impact on a species or stock listed as a threatened species or endangered species under the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*); and

(ii) Has complied with § 229.9(a)(3)(i) and (ii); or

(iii) Has the consent of the vessel owner.

(2) If an observer is placed on a Category III vessel, the vessel owner and/or operator must comply with the requirements of § 229.7(c).

(e) *Alternative observer program.* The Assistant Administrator may establish an alternative observer program to provide statistically reliable information on the species and number of marine mammals incidentally taken in the course of commercial fishing operations. The alternative observer program may include direct observation of fishing activities from vessels, airplanes, or points on shore.

§ 229.8 Publication of List of Fisheries.

(a) The Assistant Administrator will publish in the FEDERAL REGISTER a proposed revised List of Fisheries on or about July 1 of each year for the purpose of receiving public comment. Each year, on or about October 1, the Assistant Administrator will publish a final revised List of Fisheries, which will become effective January 1 of the next calendar year.

(b) The proposed and final revised List of Fisheries will:

(1) Categorize each commercial fishery based on the definitions of Category I, II, and III fisheries set forth in § 229.2; and

(2) List the marine mammals that interact with commercial fishing operations and the estimated number of vessels or persons involved in each commercial fishery.

(c) The Assistant Administrator may publish a revised List of Fisheries at other times, after notification and opportunity for public comment. The revised final List of Fisheries will become effective no sooner than 30 days after publication in the FEDERAL REGISTER.

§ 229.9 Emergency regulations.

(a) If the Assistant Administrator finds that the incidental mortality or serious injury of marine mammals from commercial fisheries is having, or is likely to have, an immediate and significant adverse impact on a stock or species, the Assistant Administrator will:

(1) In the case of a stock or species for which a take reduction plan is in effect—
